Diesels have TONS of untapped potential from the factory. Left Coast Diesel is here to help!

Free-flowing exhausts, cold-air intakes and software modifications can make your diesel faster, make it tow better and more importantly, increase fuel economy! Whether you want to take your truck to the drags, or just need a little help towing that giant Toy Hauler, Left Coast Diesel can help.

All of our employees own, drive, tow and have fun with their diesels, and we have tested many of the products you may be considering. Feel free to swing by and we can take you on a test drive or provide you with some consultation on what parts might be best for your application.

Some examples of parts and services that we offer for your diesel include:

- CARB Legal systems from Magnaflow, MBRP and others
- Legal Cold Air Intakes from S&B & aFe
- Software upgrades from Banks, Hypertech & Superchips
- Transmission Upgrades from Goerend & Suncoast
- Diff and Trans covers from Mag-Hytec
- Gauge Kits with DiPricol, Isspro and AutoMeter
- Bypass Filter Installation
- Brake Controller Installation
- Shocks, Springs, Wheels and Tires
- FASS and AirDog Fuel System Upgrades
- Dyno Testing--Now with Load Cell!!
