From RTTLROD First Day

From June 19th Update

Finally time for an update! We scrapped the idea of the drag truck in favor of a couple of more interesting projects. The first one, already deep in progress, is RattleRod. Erik picked up a 1967 Chrysler Newport Convertible for a 12v transplant. Imagine a 600HP, 25+ MPG car that runs 12's and can cruise six adults with comfort and style....yup, that's what we have in mind.

The entire build is being archived at rattlerod.blogspot.com , so bookmark that page and check it out!
